Notes:

<hr>

Go to devdocs.io and select the element you want to use and check under tag omissions if you are allowed to omit the end tag

<center>

<hr>: draws a horizontal line. You don't need an ending tag to use it..

<!-- -->

Html attributes: html tags can have attributes you can check the attributes of each tag in devdocs.io. You can modify the default tags using this attributes.

HTML Attributes

<hr size="3" noshade> : no shade specifies that it is a solid horizontal line. size is used to specify its size.

web.archive.org

<h1>THE ADVENTURES OF
 SHERLOCK HOLMES</h1>: you can use
 in the middle of an h1 tag like this one. It will move half of it to a new line

<!--hale-->: used to make comments. We can place them in between <!-- -->.

https://web.archive.org/ :- time travel back to old websites. For example what yahoo looked like in 1997.

Remember What Attributes Were?

HTML Attribute

<hr size="3">

HTML element

Summary: <hr>: horizontal line. no closing tag.

<center>: used to center. has closing tag.

<!-- -->: used to comment.

HTML attributes: used to change tags from default.

-<hr size="3" noshade>: noshade means it is a solid straight line.

web.archive.org :-time travel to websites past and see what it looked in the 1900s.
