Topic/Title: Installing Bootstra	up (in the second secon
Keywords/Questions:	Notes:
Ctrl+/ >Get Started>CSS	Ctrl+/:-used to comment out on Atom whether html, css,
	There are 3 ways to install bootstrap to your website:
	#fi You can copy the code under CSS from getbootstrap.com>Get Started Then
	paste it under your <head>. This will add CSS to your page<b>žFZWIWM</b> aX</head>
	ge[`YfZ[e[efZSfagdTdaieWdUZW]e[XiVSYdWSWkZShWTaafefdSb[e[`efS^W
	TkagdTdaieWdTVMadvWai`'aSV[`Y[f
>Get Started>Starter Code >Download>Completed CSS&JS	Sfi You can get the starter template under getbootsrap.com>Get Started. Then
	use it. The advantage of using this is that for some]components of bootstrap
	to work, they actually need some JavaScript, and this has the complete set.
	%fiYou can download fZWW/Wrom getbootsrap.com >Download>
	Compiled CSS and Javascript section. FZW SWfZWfiles downloaded fa kag
	i We[fWXa'VW]inside the css folderžThen kag US` geWWSf[hWbae[f[a`[`Yby
	adding . 1 dW 'efk'\\Z\\X' Zd\X''css/bootstrap.css"> inside the <head>.</head>
	The disadvantage of using this method is that you need to download all the
	bootstrap files when it tries to load up your website, which takes a little mor
	time to load the page.
	Throughout the course we will use the first method of copy and pasting the link from
	getbootstrap.com>Get Started>CSS inside our head.
Summary: Ctrl+/ :- used to	comment out on atom
3 ways to install l	pootstrap in your website:
•	ststrap.com>Get Started> CSS. copy link and paste in atom
2)getboo	ststrap.com>Get Started> Starter Code. copy code and paste in atom
3)getboo	tstrap.com>Download> Compied CSS & JS. download and use relative positioning.
We will be using	the first method in this course from the above 3
