Topic/Title: Bootstrap Containers
          Bootstrap Buttons & Font Awesome

Keywords/Questions:

class="container"

class="container-fluid"

<button type="button">

class="btn btn-lg"

class="btn btn-sm"

fontawesome.com

>docs>components>buttons

Notes:

<div class="container">

-Used to horizontally center the content inside.

-When we change the screen size. the content inside will be kept horizontally centered.

-When we change screen size the percentage of the screen width covered by the

container varies

<div class="container-fluid">

-the content inside will always occupy a 100% of the width of the screen.

-when we change the screen size, the content inside will always occupy 100% screen

width.

```
<button type="button" class="btn btn-outline-primary">Primary</button>
<button type="button" class="btn btn-outline-secondary">Secondary</button>
<button type="button" class="btn btn-outline-success">Success</button>
<button type="button" class="btn btn-outline-danger">Danger</button>
<button type="button" class="btn btn-outline-warning">Warning</button>
<button type="button" class="btn btn-outline-info">Info</button>
<button type="button" class="btn btn-outline-light">Light</button>
<button type="button" class="btn btn-outline-dark">Dark</button>
```
-When you hover over each of the above buttons we get:

-No need to memorize the colors we can get them from getbootstrap.com>docs>

components>buttons.

Summary:

<div class="container">:-content within will be horizontally centered.

<div class="container-fluid">:-content will cover 100% of the screen width.

<button type="button"></button>:- to create buttons

class="btn btn-lg":- to make the button size large.   class="btn btn-sm":-to make the button size small.

fontawesome.com :- a place to find popular icons like apple and google play icons.

-we need to copy and paste a <script> code on the <head> part before applying it.

<button type="button"></button>:

   −html element used to create clickable buttons.

    −we always need to specify the type.

button size:
    −we can change the size of our button by using:

        −class="btn−lg"

```
<button type="button" class="btn btn-primary btn-lg">Large button</button>
```

Large button

        −class="btn−sm"

```
<button type="button" class="btn btn-primary btn-sm">Small button</button>
```

Small button

fontawesome.com:

    −best place to get cool icons.

    −before using icons from here in our code we should first

        1) Create an account

        2) Login to your account

        3) Go to Kits

        4) Select the Kit file and open it

`   5) Copy the code that starts with <script....

        6) Past it in the <head> of your project

        7) Select Icons in fontawesome.com

        8) Search for the particular icon you want to use

        9) Select the icon you want to use and copy the code and paste it wherever you want to use the code.(The font awesome code for icons starts with the <i> tag, you can replace the <i> tag with <span>, but it won't make any difference on the code)

```
<i class="fa-brands fa-apple"></i>
```
